Full Service From Concept to Completion

Mopec is responsible for designing, engineering and outfitting some of the finest morgue facilities in the world. These facilities include medical examiners, hospitals, universities and research laboratories throughout the United States and around the world.

Our services are truly complete, from inception and design through engineering, manufacturing and final installation. Because of our full-service philosophy, Mopec can eliminate any potential problem, dramatically reducing costs and installation time.

We've developed a reputation for providing not only outstanding equipment and genuine full service, but we also provide unique, innovative solutions to a broad range of special morgue applications. We do more than deliver the finest quality equipment — our greatest strength lies in our ability to design the facility that completely meets your needs.

The Detail is in the Design

Proper design is the first and most important step in developing a morgue project. Our 30+ years of practical experience in morgue design can go to work for you. We work closely with the architect and the end user, making suggestions and sharing ideas regarding morgue designs we've done around the world.

We review space requirements, volume and activity and budget constraints when we design the cadaver handling/storage system and autopsy/dissecting equipment that best meets your needs. We leave no stone unturned! Our engineering staff is always available to visit your site or facility. This one-on-one concept will ensure a state-of-the-art morgue design that will save time, increase productivity and provide the utmost in sanitary work areas.

Expert Engineering

Once the design is complete, Mopec engineers provide you with details of the project, from drawings and specifications of the equipment to air handling, electrical and structural requirements. Mopec will assist you in even the smallest of details — details that may turn into very expensive cost overruns if not properly managed.

Quality that's Guaranteed

Cost-effective manufacturing of quality equipment goes hand in hand with proper design and engineering. Our many years of experience, coupled with our factory-to-morgue pricing, allows us to produce the highest-quality equipment at the most competitive prices in the industry. We use only the most durable and long-lasting materials that have been practice-proven in morgues throughout the world. Our trained personnel will expertly manufacture your equipment, carefully adhering to every engineering detail. After fabrication, our quality control engineers go to work!

Autopsy Carts & Anatomy Dissection Sinks

Our portable autopsy carts are designed to integrate smoothly with our wall-mounted sinks, eliminating the physical strain of moving the body. All of our carts feature an exclusive Total Locking System — all four wheels can be locked from any one corner of the cart — and are available in fixed slope, adjustable slope, roll-on, and hydraulic lift and tilt styles.

Pathology Workstations

Mopec carries a comprehensive line of laboratory fume handling equipment, all configured to suit your needs. Available in countertop, freestanding, or elevating, our units can be used with your facility's ventilation system or with a self contained filter.

Cadaver Lifts & Accessories

Mopec's cadaver lifts and lift bar accessories are designed to work in conjunction with Mopec's cadaver carts and cadaver racks. Our lifts are available in manual, power-propelled and scissor lift. When used with the different accessory bars, body transport has never been easier.

All of our equipment is factory tested under laboratory/morgue conditions prior to shipment. When you receive your Mopec equipment, it works! We guarantee all of our equipment with a full, one-year, unconditional warranty.

Mopec can also provide custom-manufactured equipment, often for less than the cost of standard products. Our major equipment line includes:

- Wall-Mounted Autopsy Sinks • Anatomy Dissecting Sinks
- Portable Autopsy Tables • Fume Handling Equipment
- Free-Standing Autopsy Tables • Stainless Steel Cabinets
- Morgue and Walk-In Refrigerators • Cadaver Storage Systems
- Necropsy Tables • Pathology and Histology Products
- Dissection Instruments

For a complete catalog detailing our products and services, please call **1-800-362-8491**.

Refrigerator Body Racks

Morgue Refrigerators

Designed to accommodate all other Mopec equipment, our walk-in refrigerators include pre-assembled cooling system, controls and accessories. We offer an assortment of styles, sizes, models of morgue refrigerators; including drawers that telescope and stationary conveyor styles. All internal mechanisms are made for easy body placement and removal.

Autopsy Tables

Dissection Tables

Grossing Stations

Refrigerators and Lifts

Autopsy Islands

Necropsy Equipment

Facility Installations

Handicapped Workstations

Engineered for lab facilities with wheelchair users. Large open space easily accommodates a wheelchair while the table's multi-function fixtures are within easy reach from a sitting position.
