

GR 10

Floor stripper

Ingredients:

Combination of special water-based cleaning agents and film solvents. GR 10 contains less than 5% anionic surfactants, non-ionic surfactants, NTA. Other ingredients: water-soluble solvents and perfume oil.
pH-value: approx. 10.

Performance:

Quickly and easily removes old and multilayered wax and selfshining films as well as stubborn stains. Also appropriate for final cleaning of buildings prior to hand-over. Can be diluted with water in any proportion. Agreeable fragrance.

Application notes:

All kinds of floorings. Exception: unsealed wooden floors.

Usage:

Depending on the nature of film residues and encrusted dirt, apply to the floor conc. or dilute up to 1:10 with cold water, leave to take effect and work with a scrubber or floor machine. Pick up dissolved dirt and film residues. Wipe off while wet.

Precautions for use:

Caution: the surface is slippery immediately after polymer residues have dissolved. It is always advisable to work on small sections at a time and to ensure adequate ventilation during the cleaning process. Keep containers tightly closed and out of the reach of children.

Ecology:

This product is subject to regulations governing the environmental compatibility of washing and cleaning agents and the associated regulations on the biological degradability of the raw materials used.

Comprehensive information about the environmental characteristics of this product is available on request.

Give only completely packaging to special waste disposer.

This product is designated for industrial use.
