

### Universal Machinery Electrolux Palenzo "PAL 60"

UM 60

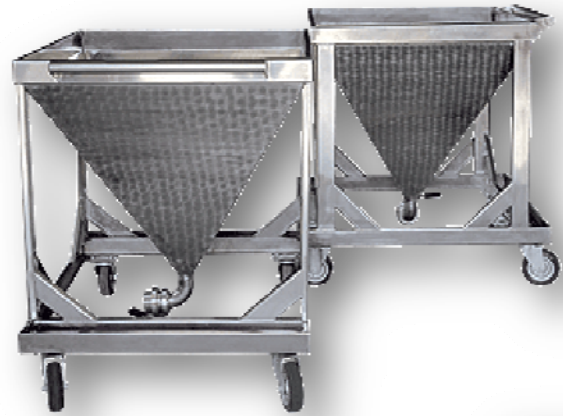

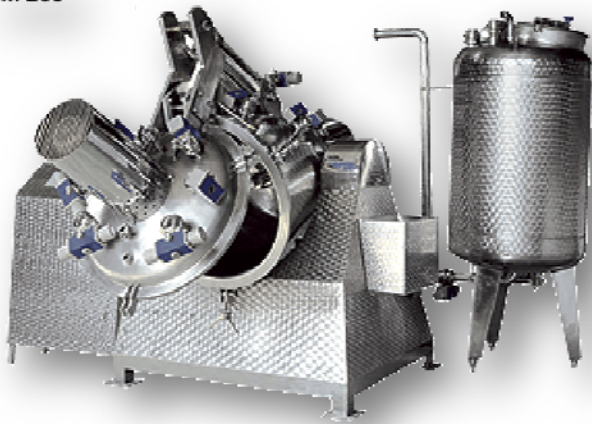

UM 60

Automatic packer can pack powders, granulated and liquid substances in package range from 5 g to 250 g. Machine is performing 4 seals (two plastic rolls with front cover and back side). Machine can perform conveyor print without markers. The machine is produced from stainless material in very consistent shape. All performed processes are controlled by microprocessor, with changeable parameters. The dosing facility performs volume, snakelike and piston dosing (for high density liquids). On Your request, we can ship additional equipment, as spiral supplier of material in basket, transporting facility for packed goods.
