## INDUSTRIJA ZA GREAČI

Стаклено - керамичките шпоретски грејни плочи користат топлински грејни елементи. Принципот на работа на овие грејни плочи е базиран на користење на намотани грејни жици монтирани во еден изолиран помошен сад вметнат во друг метален сад во облик на тава.

Целокупниот овај склоп се монтира под стаклената керамичка шпоретска плоча. Грејната жица има средна работна температура од  $1000^{\circ}\text{C}$ . Термостатот врши температурна заштита на стаклената плоча од надминување на  $600^{\circ}\text{C}$ .

Неодамнешните технолошки иновации имаат управување за делумна замена на грејната жица со халогена ламба со инфрацрвен енергетски спектар. Грејните жици односно изолацијата се дизајнирани да не го запираат инфрацрвеното зрачење насочено нагоре, но го редуцира колку што е можно повеќе страничното, а со тоа осигурува една висока ефикасност. Овие грејни елементи овозможуваат апаратите да постигнат работна температура на шпоретската плоча за многу кратко време.

### Структура:

- 1) канал за грејната жица; 2) Високо отпорен сад со изолација од температура, материјалот има мала топлинска проводливост, на сметка на хемискиот стабилен материјал; 3) термостат за температурна заштита од температури повисоки од  $600^{\circ}\text{C}$ ; 4) халоген сијалица, специјално дизајнирана за готварски функции, која гарантира минимум 5000 работни часови.

ELEKTROLUKS

## ЕКОНОМИЧНО ЗАТОПЛУВАЊЕ НА ВОДА SPA Heating Units

NEW

Основни технички спецификации:

- Грејно тело Ni-Cr легура INCOLOY 825, која нуди зголемена отпорност од корозија.
- Ниска густина на енергијата ( $< 7W/cm^2$ ) што нуди зголемен работен век на греачот.
- Далечинска контролна кутија за температурно поставување од  $5 - 45^{\circ}C/95^{\circ}C$ .
- Разновидна снага:  $200W - 9kW$  на  $230/380V$
- Целокупна апаратура е опремена со 3 м долго гумирано кабел ( $3 \times 2.5/5 \times 2.5$ ) со приклучок погоден за надворешна употреба.
- Потребна сигурност. Висока изолациона отпорност ( $>500$  мегаоми) за превентива од струјни удари.
- Намена: за парно греење, аквариуми и затоплување на базени.

# ELEKTROLUKS

- FABRIKA ZA GREANJE I

## GVS - 1000 - 3000

Snaga: 1000, 2000, 3000 W,  
napon: 24, 48, 110, 220, 380 V  
Namena: klimatizeri

## GK - 2000 - 2500

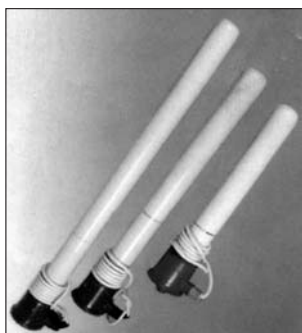

Snaga: 2000, 2500 W, napon: 220 V  
Namena: [poret Kerting (gorewe)]

## GK - 1500 - 3000

Snaga: 1500, 2000, 3000 W,  
napon: 220, 380 V  
Namena: kaloriferi

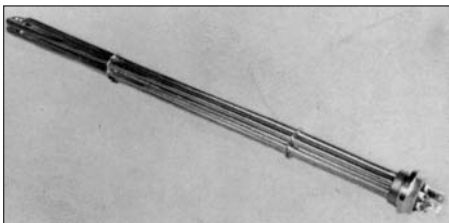

Kon~ar, Klimaluks, Sokol

## GALVANSKI GREANJE I

### PG - 600 - 3000

Snaga: 600, 1000, 1500, 2000,  
3000 W, napon: 220, 380 V  
Materijal: prohrom, porcelan,  
staklo ili titan  
Namena: galvanski grean~e

Servis i prodavnica:  
Bra}a Mingovi 18, Bitola  
(stara ~ar{ija)

# ELEKTROLUKS INDUSTRIJA

- FABRIKA ZA GREANJE

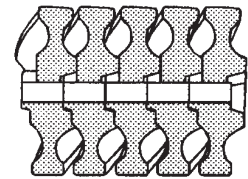

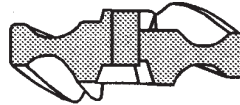

Vložki za električni grelnik

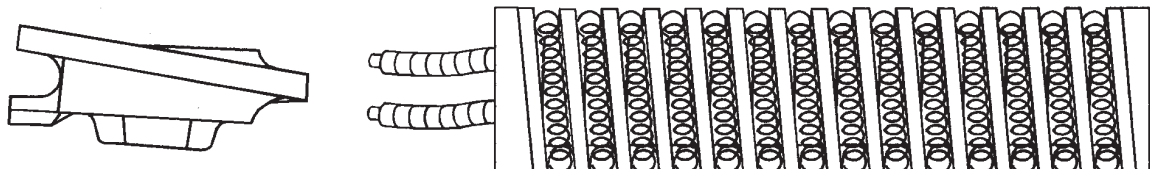

Ovие grelniki najgolema primena najdoa vo industriskite postrojki (galvaniziralka oprema, razni kadi i transveri za mиеve na delovi, razni peќki i su{ari, razni kotli za zagrevawe na voda, maslo, mazut i drugo. Voglavno se izrabotuvaa po naraќka.

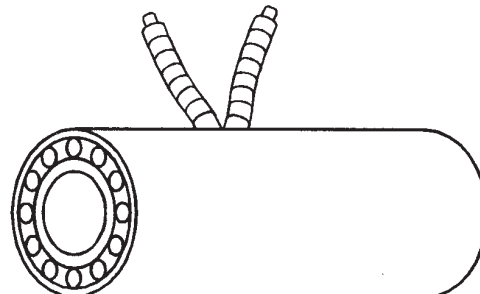

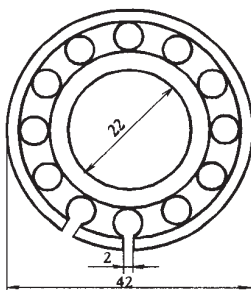

Električni grelnik na tehniќka keramika za vertikalno vgraduvawe, za TA peќki i lemiliќi.

Elektriќen grelnik za vertikalno vgraduvawe. Najde primena vo galvanizaciskata oprema, za razni su{ari i kaloriferi, za topli zavesi i dr.

Elektriќen grelnik za TA peќki 220 V/833W, 220 V/1000W, 220 V/1333W. Najde primena i za kaloriferi.

Elektriќen grelnik za lemiliќi za napon 220 V i snaga od 150 do 500W, po naraќka.

Servis i prodavnica:  
Braќa Mingovi 18, Bitola  
(stara naraќija)
