

Ingredients:

100 g APESIN DISINFECTANT CARE WIPE contain 3 g quaternary ammonium compounds, less than 5% non-ionic surfactants. Other ingredients: waxes, perfume oil and additives. pH approx. 4.5.

Activity:

Disinfection, cleaning and care in one operation. Concentration for use 2%. The protective film formed gives the floor a cared-for appearance. The shine and durability are enhanced by polishing. At the same time, carry-over of organisms by cleaning water and equipment is prevented. No unpleasant odor. Pleasantly perfumed. Free of formaldehyde, any other aldehydes and phenols.

Range of application:

All kinds of floorings, except unsealed wooden floors.

Directions for use:

Suitable for any wet-wiping method. Work with 2% solution for use. Also suitable for prevention of hospital cross-infection and in general practice. Do not wipe off with water.

Special precautions:

In accordance with guideline UVV § 7 (Environmental Preventive Regulations), gloves must be worn when handling disinfectants. Avoid contact with eyes and skin (immediately rinse off thoroughly with water). Keep tightly closed and out of the reach of children.

This product is intended for industrial use.

Environmental aspects:

This product is subject to the Law on the Environmental Compatibility of Washing and Cleaning Agents and the attached implementing regulations on the biological degradability of raw materials.
