

HEKA-Favorit 84 for 96 hen eggs - Cabin Incubator made from synthetic material with computer contro

999,00
EUR

FAV084

Our “little one” in top form. The casing is made from hygienically synthetic material, assuring easy cleaning of the appliance. **The computer control system assures a reliable and failure-free regulation of the temperature humidity egg turning rhythm and cooling off time.** The convenient switch panel displays the data in big illuminated letters. A great advantage is that **the temperature and humidity are shown simultaneously.** Our high quality technical equipment includes the following: **Fully automatic egg turning, humidity and temperature regulation, insulated glazing, interior lighting and 2 turnable trays of your choice, optional wooden or plastic ones.** Please note, wooden trays hold less eggs.

Size: width 50 cm, depth 50 cm, height 65 cm

HEKA-Favorit 126 for 144 hen eggs Cabin Incubator made from synthetic material with computer contro

**1.050,00
EUR**

FAV126

This incubator speaks for itself. Take advantage of this high quality technical equipment. The temperature, humidity, egg turning and cooling off time are entirely regulated by our precise and failure-free computer control system. The convenient switch panel displays the data in big illuminated letters. A great advantage is that the temperature and humidity are shown simultaneously. Fluctuations are therefore eliminated. Our standard equipment includes the following: Fully automatic egg turning, humidity and temperature regulation, insulated glazing, interior lighting and 2 turnable trays of your choice, optional wooden or plastic ones. (wooden trays hold less eggs.) Please state in your order desired trays and whether you would like to connect the appliance straight to the water supply, or you require a water reserve tank, which will be fitted by us at no additional cost. We grant a two-year-warranty on our incubators

Size: width 50 cm, depth 50 cm, height 65 cm

HEKA-Favorit 168 Cabinet Incubator made from synthetic material with computer control system - capa

1.100,00
EUR

FAV168

The Heka Favorit 168 offers a total capacity for 192 hen eggs. This incubator is a high quality technical appliance, white plastic casing for easy care and user-friendly control system,. All data is displayed in big digital letters. The computer control system assures a reliable and failure-free regulation of the temperature, humidity, egg turning rhythm and cooling off time. A great advantage is that the temperature and humidity are shown simultaneously. Fluctuations are therefore eliminated. Our high quality standard equipment includes the following: **full automatic egg turning, humidity and temperature regulation, insulated glazing, interior lighting, four turnable trays of your choice and two hatching trays, optional wooden or plastic ones.** (Wooden trays hold fewer eggs.) Please state in your order desired trays and whether you would like to connect the appliance straight to the water supply, or you require a water reserve tank, which will be fitted by us at no additional cost. **We grant a two-year warranty.**
