

# SICO 1800 MOBILE FOLDING STAGE

## FEATURES

The 1800 stages are designed to be set in place, then folded up and put in storage by just one person, saving you time and money. Each stage unit rolls freely on its 4 wheels into position - no lifting and carrying of heavy decks.

A rigid, one-piece unitized 14 guage steel frame is designed to support the deck load of 125 lbs./square foot for strength and durability. Each stage unit sits on 8 direct-to-floor load bearing legs and not on wheels.

Built in stage connectors create a firm positive lock for a riser or stage setup.

Sico offers a complete line of steps, guardrails, ramps, chair stops, and drapes for a professional looking stage presentation.

### ADDITIONAL FEATURES

- The Sico 1800 Series Stage has been used and recommended by more hotels, clubs, and convention centers than any other portable stage on the market.
- Available in single height and dual-height models (8" increments).
- Units are available in 4'x8' and 6'x8' deck sizes. The larger 6'x8' size allows for a third less units to purchase, fewer units to operate, and fewer units to store versus conventional 4'x8' sizes.
- Take advantage of the free space analysis drawings which will provide you with the appropriate number of stages and stage accessories.
- Serial numbers for easy identification.
